**KÄHRS LUXURY TILES**  
BEAUTIFUL FLOORS FOR EVERYDAY LIFE

WENTWOOD.

# STUNNING LOOKS. EXCELLENT PERFORMANCE.

Muddy boots. Dirty paws. High heels. We know that floors in most modern homes are exposed to many challenges. That's why we've created a range of floors that combine looks to enhance your home with performance, as well as provide you with peace of mind.

Kährs Luxury Tiles is a range of luxury vinyl floors designed for everyday life. They offer the beautiful and natural appearance of wood and stone, while providing all the benefits regarding resilience and maintenance of modern flooring technology. The wide range of different designs and colours makes it easy to find a floor that will match your individual interior style.

Not only are these floors attractive and durable, they also promote a good indoor environment as they are phthalate-free, reduce sounds and are soft to walk – or play – on. Our Click format is easy to install – even with underfloor heating, and we also offer designs in dryback and loose lay formats depending on your preference.

Simply floors that make everyday life a little more luxurious.

# DESIGNED TO LAST

Kährs Luxury Tiles are based on innovative design and modern flooring technology. The result is a range of luxury vinyl floors inspired by wood and stone, with maximum durability and a long life. They are scratch and dent resistant, easy to maintain, as well as to install.

## NATURAL BEAUTY IN DIFFERENT LOOKS

Our many wood and stone designs, ranging from light to dark, are perfect examples of the strong Swedish design tradition characterised by a timeless, yet contemporary elegance. They offer endless possibilities to choose, mix and match for every space of your home.

## MAXIMUM DURABILITY

The Luxury Tiles floors are constructed to ensure excellent durability and a long life. The ceramic coating makes the surface scratch and dent resistant, while the waterproof material prevents spillages from making any permanent damage.

## SAFE AND SOUND

Our home is where we live, breathe, sleep and where our children grow up. Naturally, we want our indoor environment to promote everyday comfort and health. That's why we've made our Luxury Tiles floors phthalate-free. Designs in the Click format have a built-in sound-reducing system and are also soft to walk – or play – on.

## INSTALLATION MADE EASY

We have made our Luxury tiles floors easy to install, in order for you to be able to do it yourself. The tiles and planks in the Click format are locked together with a 5G Click system, providing excellent stability along with the rigid core. Sound reducing is built into the tiles, contributing to making your home a calm and peaceful space. These floors are also perfect to combine with underfloor heating systems – providing your home with even more cosiness. The Dry Back tiles and planks are glued down.

## EASY TO CLEAN

Our Luxury Tiles floors require minimal maintenance. The ceramic coating provides a smooth surface that is easy to clean using a wet mop and standard cleaning products. The coating also makes the floors resistant to daily wear and tear, preventing the floor from getting ingrained with dirt and grime.

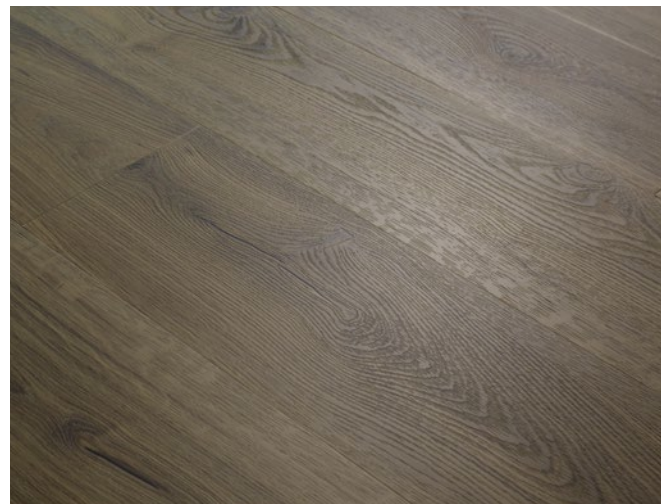

# IMPRESSION

It takes centuries, even millennia, for nature to create the beautiful expressions we see in materials such as wood and stone. The knots, cracks and furrows reveal the material's history and create unique features that embody our idea of beauty and harmony.

With Impression, we have carefully hand-picked a collection of the most beautiful wood and stone specimens and recreated them with incredible accuracy. From warm and elegant oak to timeless granite, Kährs Impression guarantees timeless, yet modern elegance.

## A SURFACE THAT FEELS AS IT LOOKS

Impression is our most lifelike collection of vinyl flooring. Registered Embossing recreates knots and furrows with utmost accuracy, harmonising colour and texture for a true-to-nature product.

## EXTRA LARGE FORMATS FOR EXTRA IMPRESSIVE FLOORS

Our Impression vinyl floors come in extra-large formats: The wood collection comes in planks measuring an impressive 220 x 1829 mm, while the stone design tiles come in 457 x 914 mm. These larger formats enhance the material's natural impression, make smaller rooms feel larger and give larger rooms an elegant look.

## A UNIQUE LOOK

At Kährs, we have worked with wood for the past 160 years. With Kährs Impression, we draw from our experience and expertise to perfectly recreate nature's patterns and designs. All in a material made to withstand the everyday wear of a lifetime of living.

A person is silhouetted against a bright, hazy sky at sunrise or sunset. They are standing on the edge of a dark, rocky cliff, leaning over a camera mounted on a tripod. The background shows a vast, misty landscape of rolling hills and valleys covered in dense forest. The light from the sun creates a warm, golden glow across the scene.

# LET IN THE LIGHT

Oaks and deciduous trees surround the countryside home of this art-loving family with children and dogs. The light shining through the vegetation casts unique patterns onto the walls. Amplified by the wood design floors in classic pale tones, the dancing shadows create a harmonious balance between indoor and outdoor. And neither muddy boots nor dirty paws leave any lasting traces.

DOVECOT

# SOFT CONTRASTS

This architect couple lives in a house by the sea, together with their three children. Light floods in through large windows, highlighting details of the contrasting materials used to build this unique home. Wood and stone design flooring in dark tones, combined with soft carpeted floors, create an inviting contrast and absorb the brightest light during sunny spring days - year after year.

AMARO

ODENWALD

A man and a young boy are standing on a wet beach at sunset, facing the ocean. The boy, on the left, is wearing a bright green t-shirt and shorts, holding a white surfboard with a yellow edge. The man, on the right, is wearing a black and white wetsuit and black shorts, holding a white surfboard with a blue edge. The sun is low on the horizon, creating a warm orange glow that reflects on the wet sand. The silhouettes of the two figures and their surfboards are clearly visible against the bright background.

# INSIDE OUT

This coastal house sits on top of a hill close to the sea, a natural element for this lively family who are keen surfers. Their passion for the sport is evident throughout their bright and sunny home. Stone and wood design floors of sandy beige enhance the maritime feel. And neither sandy feet nor bicycle wheels will leave any permanent marks.

*The surfboard on the wall in the living room perfectly matches the sofa – as well as wood design floor.*

*The light and airy feeling of the interior, connecting indoors with the bright outdoors, makes the kitchen a wonderful place to be. Meanwhile, the tough stone design floor makes life easy for a young family with small children.*

# THE BRIGHT SIDE

This home has been designed to suit a small family who loves sport and outdoor life as much as entertaining and endless dinners with friends. Soft, muted colours and timeless furniture along with stone and wood design floors of soft grey and beige create a harmonious space – that can also resist dirty running shoes and muddy paws.

LACANDON

MATTERHORN

# FOR FAMILY AND FRIENDS

Entertaining is high on the priority list for the couple who created this perfect backdrop for a rich social life. Honey-toned wood panelling on the walls, combined with warm coloured wood and stone design floors contribute to making this a place to relax and feel comfortable. Dropping food or liquids on the kitchen floor whilst cooking – or walking in high heels – is perfectly safe, contributing to creating peace of mind.

GROSSGLOCKNER

BELLUNO

*Chili the dog is a frequent visitor to the kitchen, where many delicious meals are prepared together with family and friends. The wood design floor perfectly matches the clean design of the kitchen interior, making this a place where culinary cuisine takes centre stage.*

A close-up, warm-toned photograph of a man's hands working on a motorcycle. The man is wearing a grey t-shirt and is focused on the task. The background is a blurred workshop with shelves filled with various tools and parts, creating a bokeh effect. The lighting is soft and directional, highlighting the textures of the metal and the man's skin.

# INDUSTRIAL REVOLUTION

Raw brick walls, moody colours and quirky details create an industrial, yet luxurious vibe in this flat located in a converted factory. It is also a perfect backdrop for a bachelor who loves his bike as much as throwing a good party. Wood design floors that are as good looking as they are easy to maintain perfectly matches the mood – and lifestyle.

TONGASS

*Drama is created through the black walls of the bedroom and the dark wood and stone design floors that have been installed throughout the flat. Meanwhile, lush plants and luxurious fabrics soften the mood.*

A close-up photograph of several hands cupped together, holding dark, rich soil. A small green seedling with two leaves is growing out of the soil in the center. The background is dark and out of focus.

# A SOFTER SHADE OF DARK

How do you combine a passion for light, Scandi-style interior design with children who love to play in the mud – and a passion for gardening? This family has chosen an attractive, yet practical solution combining light, modern furniture and white walls with beautiful, dark wood design floors. The result is stunning.

CALDER

SCHWARZHORN

*The dark floors ground the light and airy interior, giving it a cosy feeling, perfect for a young family.*

## CLICK HERRINGBONE DESIGN

The Kährs Luxury Tiles Click collection features a range of narrower and shorter boards – A and B boards – specially designed for herringbone patterns.

They are installed using a quality Click system to ensure stability. Please note that these floors don't come with sound-reducing backing, as they measure 5 mm.

They come in eight beautiful wood designs, in colours ranging from light to dark.

# OUR DEFINITION OF PERFORMANCE

### CERAMIC COATING

The surface of the Luxury Tiles floors is treated with a strong ceramic coating, which gives the floors superior resistance to wear and tear, scratching and water.

### 5G CLICK

All floors in the Click format have the unique 5G locking technology which enables easy installation of the Luxury Tiles floors, as you just click the tiles together. The 5G locking system creates strong joints and promotes stability. This means that your floor will stay beautiful for a long time.

### RIGID CORE

The floors in the Click format feature a rigid core, made from a composite of vinyl and stone dust. This gives the tiles superior strength and stability – and also makes the floors easy to install. Combined with the strong 5G joints, this will give your floor maximum durability throughout its lifetime.

### WATERPROOF MATERIAL

All floors in the Kährs Luxury tiles range are waterproof, as they are free from any organic materials. This means that you can feel safe to install these floors in every room including bathrooms – always ensuring, however, that you have a dry subfloor in order to avoid mould.

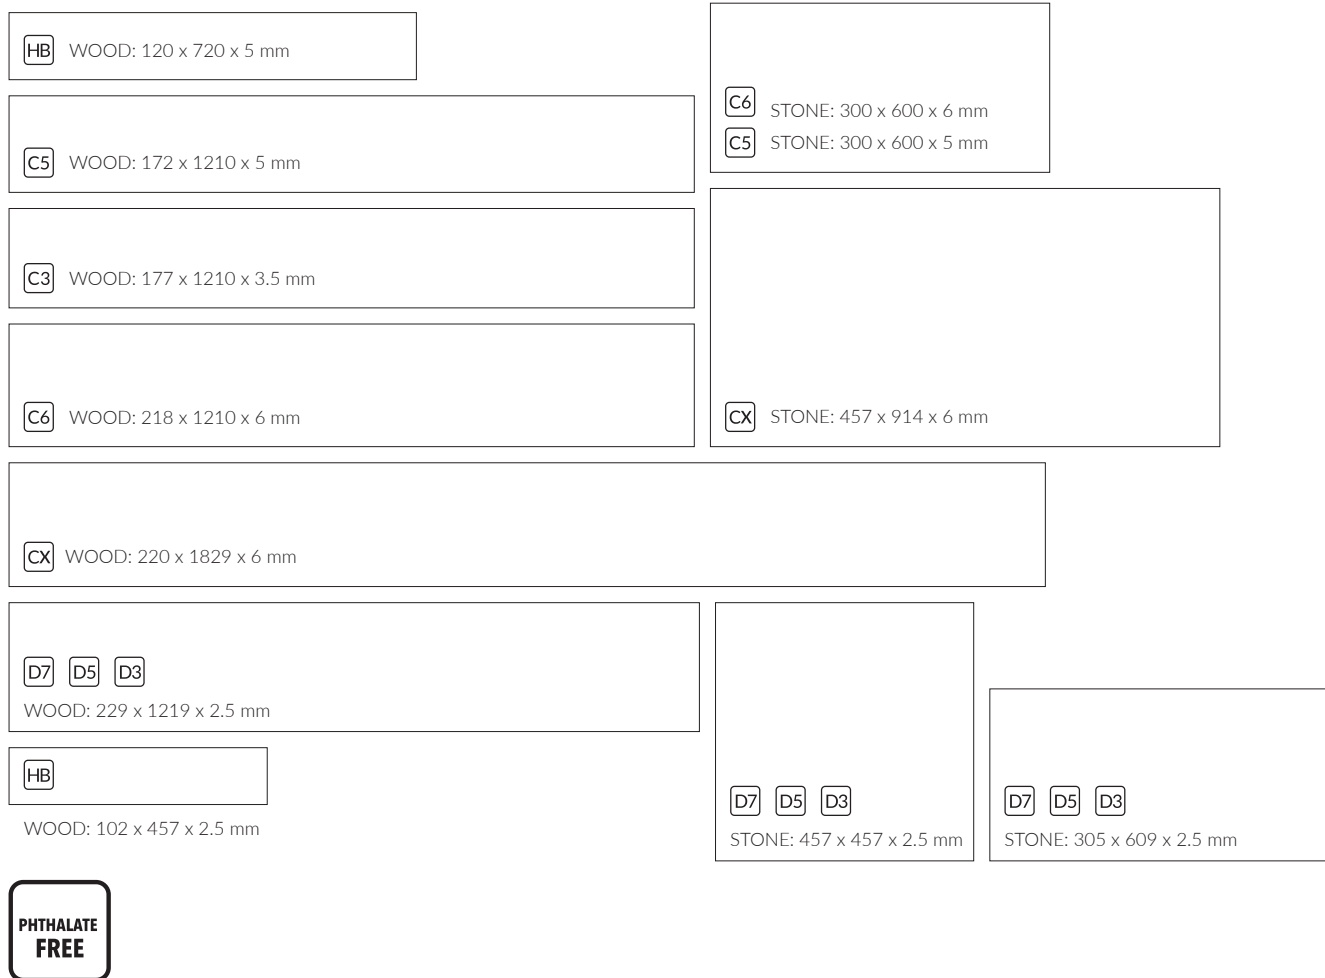

### SOUND REDUCTION

All floors in the Click format, apart from those featuring Herringbone patterns, have IXPE sound-reducing backing, effectively controlling noise and reducing the sound up to 17db

## PLANK AND TILE DESIGN

### FREE FROM PHTHALATES

All Kährs Luxury Tiles floors are phthalate-free. The floors are certified according to a number of standards, including Floorscore, M1 and French A+.

### UNDERFLOOR HEATING

All Kährs Luxury Tiles can be installed on an existing floor, making them ideal to use in renovation projects or when you want to retain the existing floor. They are also ideal for installation with underfloor heating.

### WARRANTY

The ceramic coating, 5G joint system and rigid core will give the floor a long trouble-free life. The Dry Back collection gives outstanding durability with the thickest wear layer.

The 5mm floors with a wear layer of 0.30 mm have a 10-year residential warranty

The 6 mm floors with a wear layer of 0.55 mm have a 20-year residential warranty

Dry Back floors with a wear layer of 0.7 mm have a 20-year residential warranty

FLOORS BEYOND EXPECTATIONS
